

24th November 2023

Full re-opening of OPAT for compounded Medications

Dear Customer,

I am pleased to confirm that from Monday 4th December we can now re-commence full supply of all approved compounded drugs available on the National OPAT Programme. This is due to a return to full capacity at our Sandyford compounding facility.

This means that you can now prescribe all compounded drugs that were available to order before our transition from Deansgrange to our new compounding site in Sandyford (see appendix 1 for a full list of all drugs available).

As before we will manage referral acceptances based on our available capacity for compounded devices and will continue to communicate our regular updates with 'next available date'.

We thank you for your understanding, patience and collaboration during this time. If you have any question, please contact our Customer Service team on 01 2065544.

Kind regards

Josh Woodcock
National Sales Manager – UK & Ireland - OPAT
Baxter Healthcare Ltd
